

FISCAL, PLANNING, POLICY & COMPLIANCE

Pulling Out All the Stops

NEXTGEN Bus Study

Pulling Out All The Stops
California Transit Association
11.13.19

So, what is NextGen?

A new bus network

Something for everyone

Why are we doing this?

Outdated bus network

It's been 25 years since last redesign!
Travel patterns have changed

More People

1 million new residents

More places to go

New destinations

More ways to get there

Transportation Network Companies,
MicroMobility, shared vehicles

Four Types of Customers

Frequent

Occasional

Infrequent

Non-Rider

As a % of all LA County residents

Service Parameters

All Riders

Travel Speed

Frequency

Reliability

Current

More Service

Fares

Information

Former

Security
(women, certain geographies)

First/Last Mile
(elderly, higher income)

Comfort
(odors, crowding)

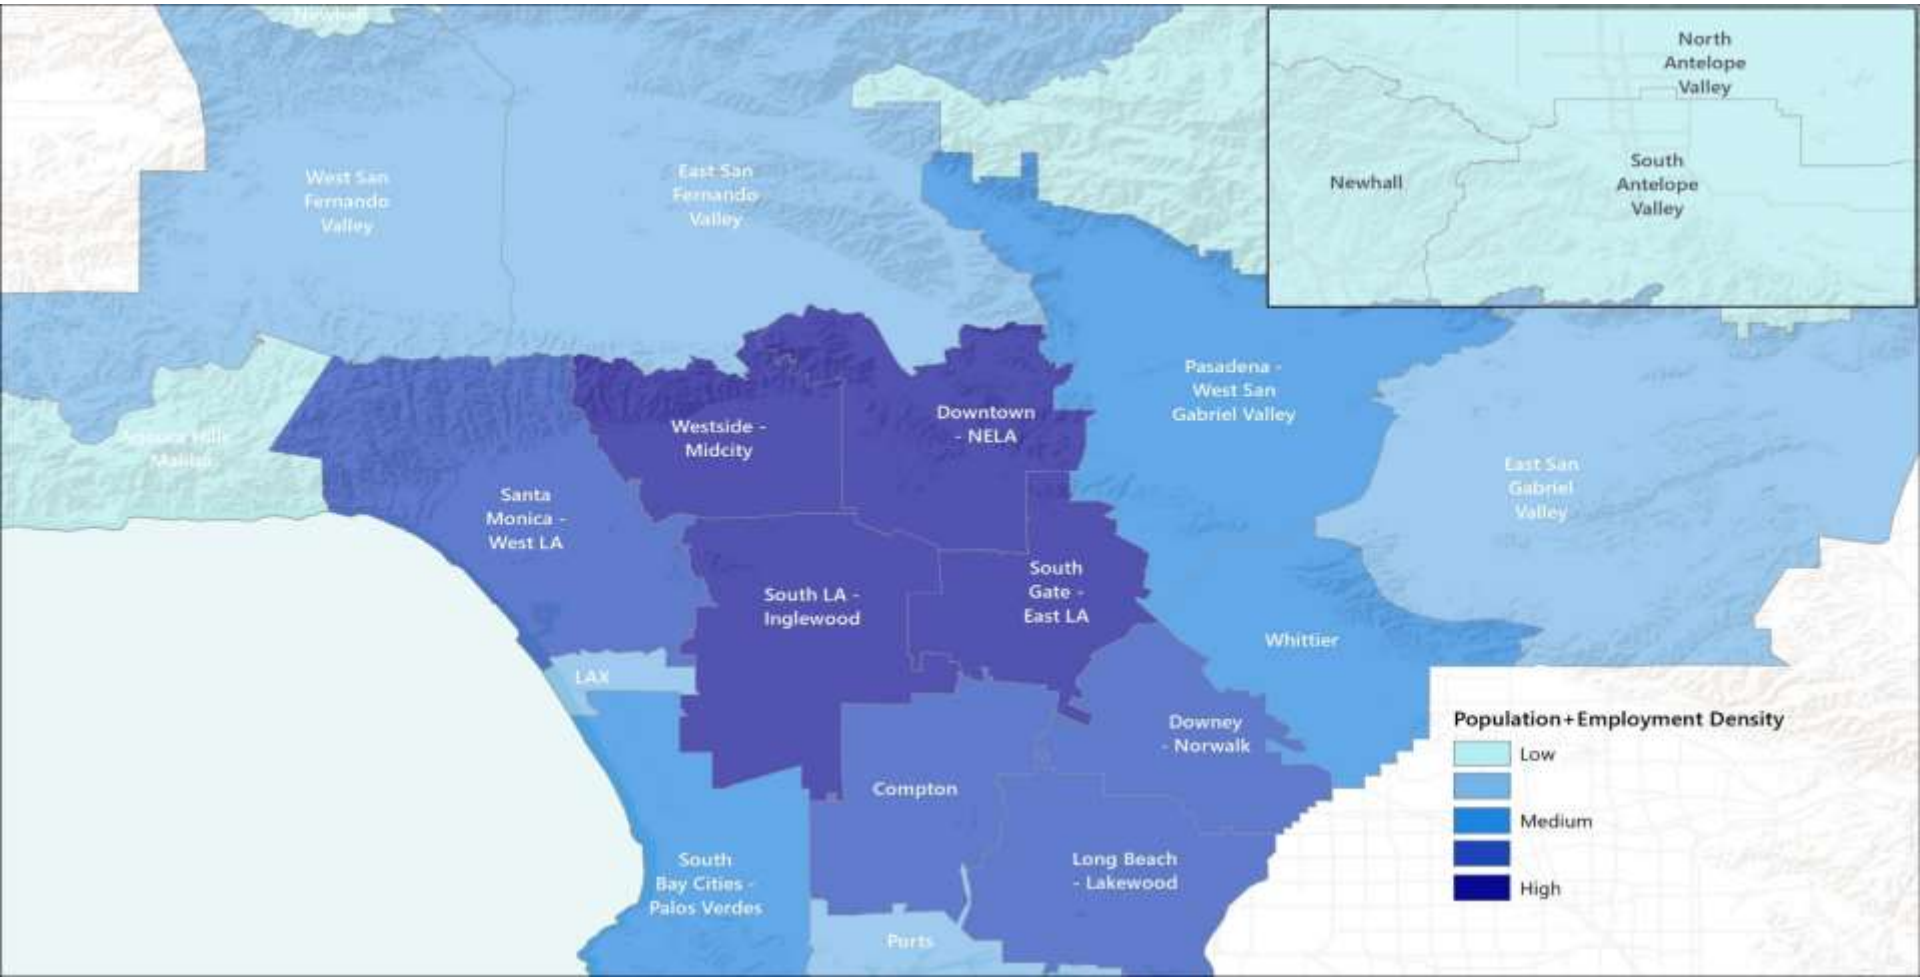

Infrequent/ Non-Rider

Information
(non-riders)

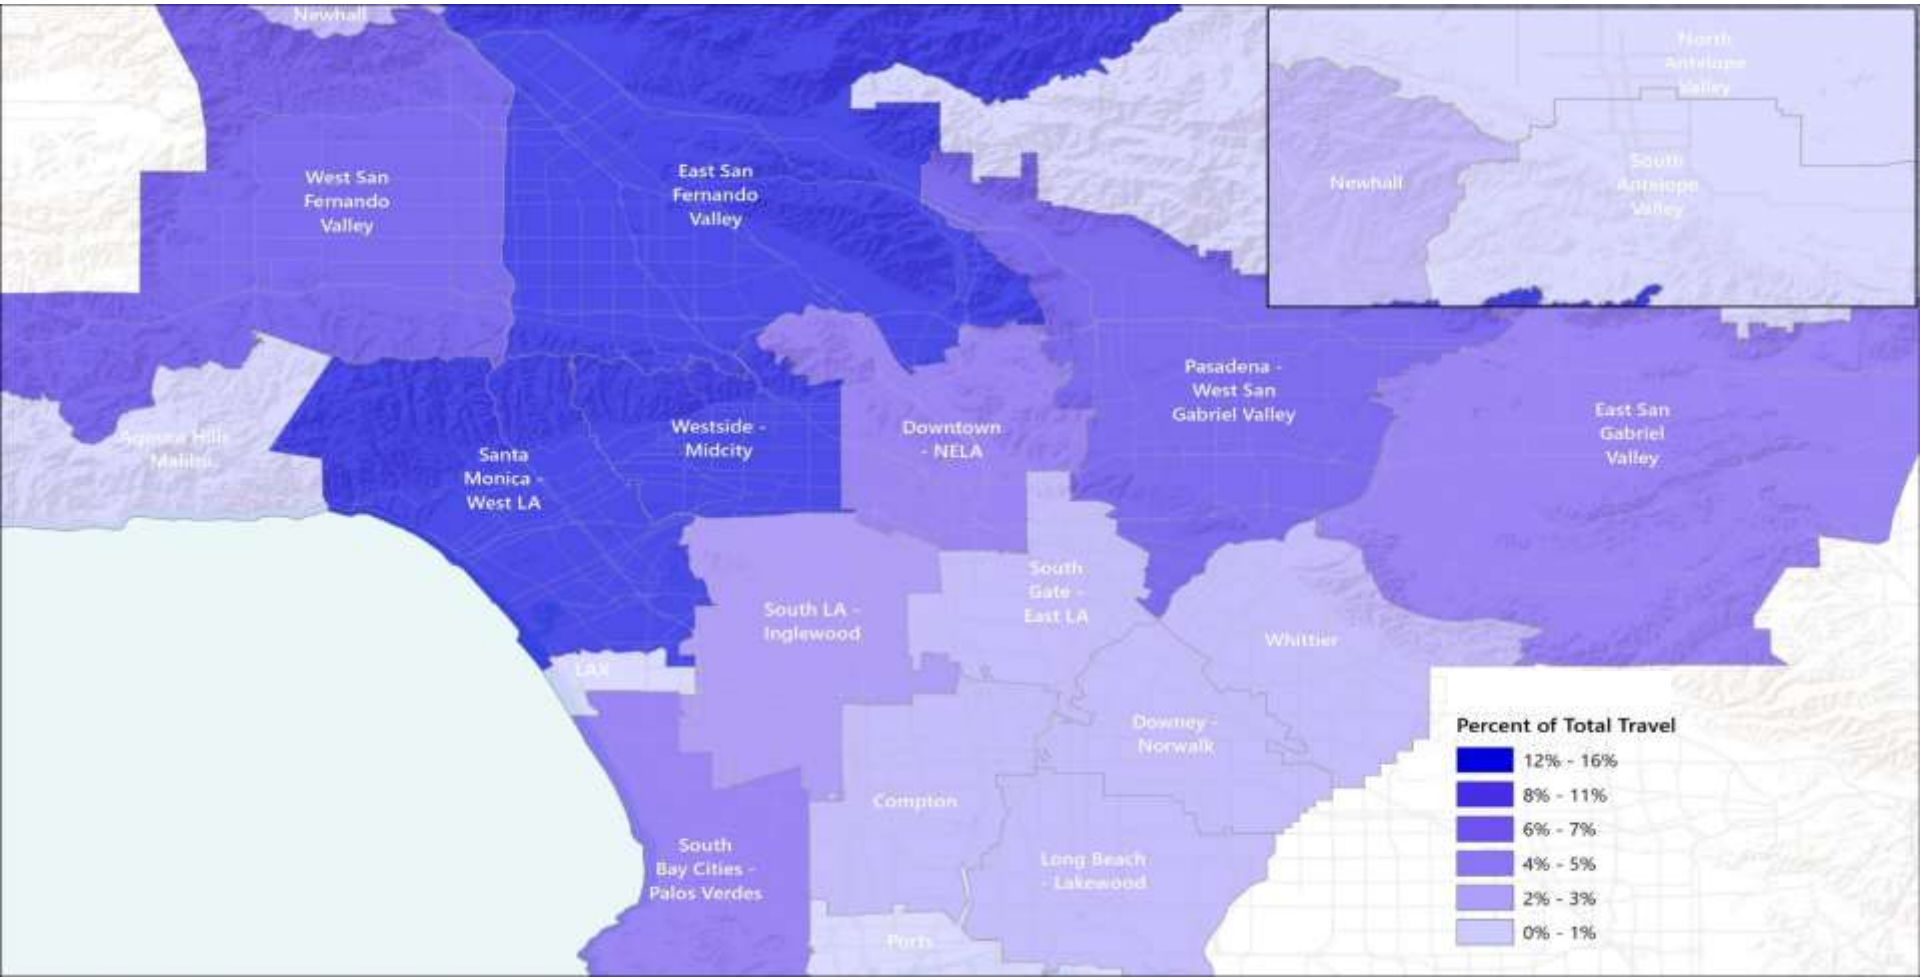

First/Last Mile
(women, youth, elderly)

Comfort
(odors, crowding)

Population and Employment Density

Travel Intensity (cell phone data)

Competitiveness of Transit

1. Run trips from cell phone data through Metro Trip Planner to identify transit path and travel time;
2. Run trips from cell phone data through Google to calculate drive time;
3. Compare transit travel time to drive time.

Competitiveness of Relative Travel Times

Travel Time Comparison with Auto

Transit Market Share

Transit is most competitive when no more than 2x slower than auto

Transit to Drive Time Ratio

Competitiveness and Market Potential

Transit Market Share by Distance & Percent of Total Trips

Transit Market Share

Increasing our transit share of short distance trips to 6% means 500,000 new trips

% of total trips

Trip Distance

Where Should We Invest Resources?

Current transit service is structured to provide the highest level of service for the morning and evening commute periods, **BUT** there is a high demand for travel through mid-day and late evening.

- Metro Service
- Commuter, Long Distance
- Other (Non-Commuter)

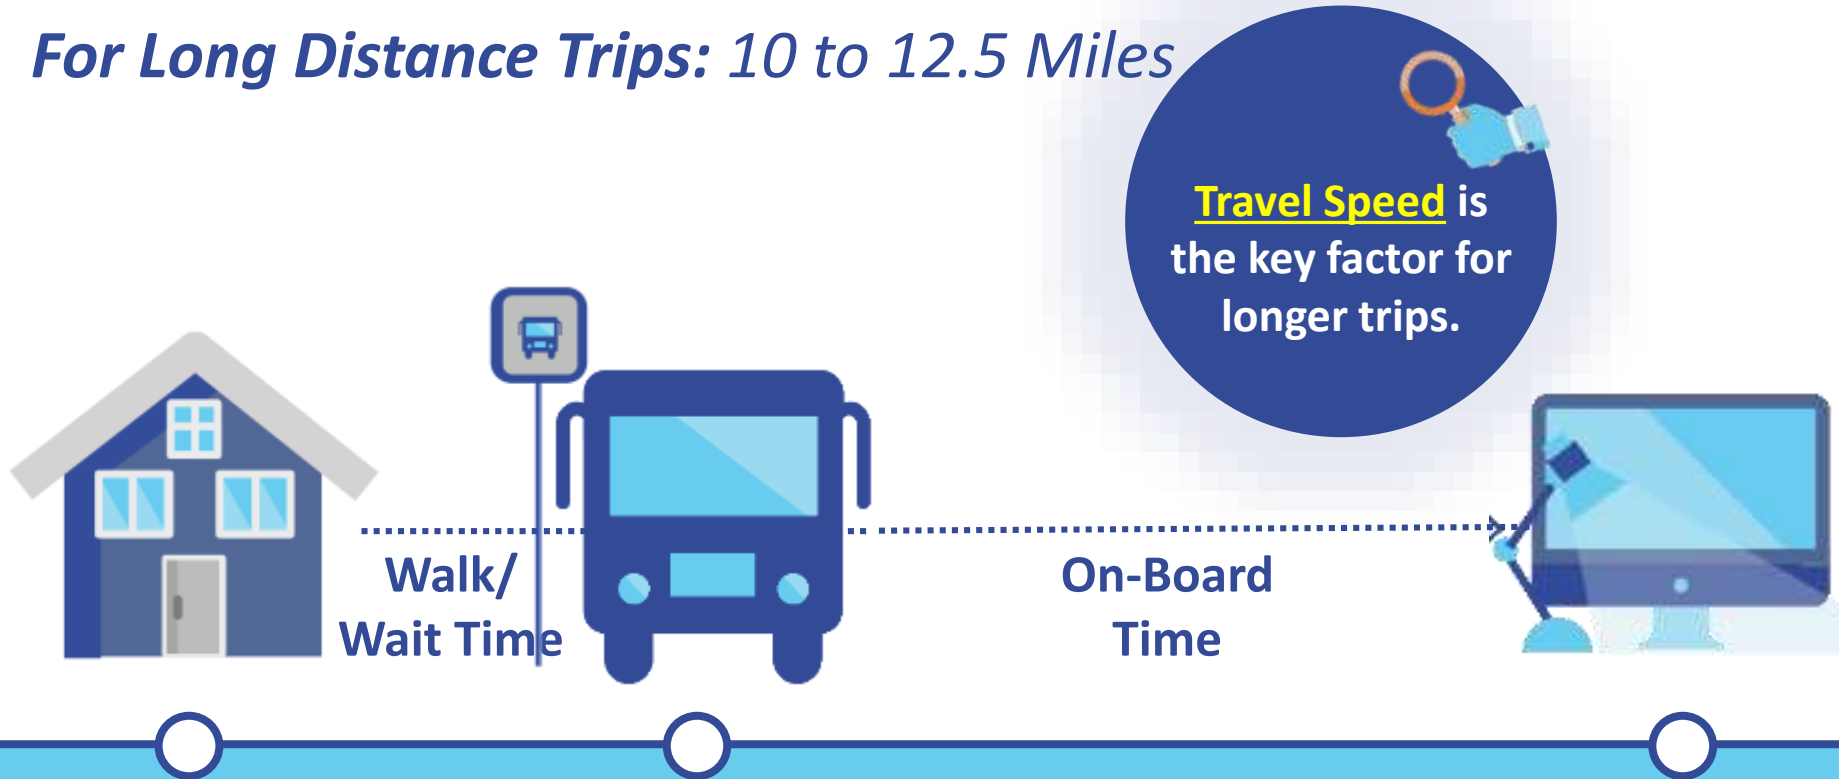

Current service does not match travel demand

When is Travel Speed important?

For Long Distance Trips: 10 to 12.5 Miles

30% of time
getting to/from transit

e.g. 10 mins

70% of time
on-board transit

e.g. 25 mins

When is Frequency important?

For Short Distance Trips: 0 to 2.5 Miles

50% of time
getting to/from transit

e.g. 10 mins

50% of time
on-board transit

e.g. 10 mins

Corridor Optimization Example: Venice Blvd.

Time (in minutes)

Represents a 7.5 mile trip

But wait, there's more! (Tomorrow)

Come check out Thursday afternoon's 3:00 PM session...
